

**WHEN THERE IS  
WATER IN YOUR WAY.**

Dewatering professionals at your service

We know how water works

# IT'S ALL ABOUT WATER. AND MOVING IT.

**Fast dewatering of a worksite is critical to productivity. Deadlines don't wait for waterlines to recede. And pumps can't choke when the going gets rough. That's why ABS pumps are on the job dewatering more and more construction sites, tunnels, mines, shipyards and dry docks.**

## **A complete solution provider**

The strength of ABS lies in our unique ability to combine products, services and application know-how.

While we supply world-leading pumps, these are only one part of a truly integrated offering. Our rich base of technical and real-world experience enables us to create complete solutions for dewatering applications.

ABS also ensures complete equipment supply when required, including pipe-work, valves, generators and on-site installation. Combined with our service, control and monitoring functions, this allows our customers to always be one step ahead.

## **AT YOUR SERVICE, WHATEVER DEWATERING SUPPORT YOU NEED**

- ✓ Complete project design
- ✓ Sales, rental or mixed solutions
- ✓ Extensive on-site services
- ✓ 24-hour surveillance
- ✓ On-site installation or pick-up at ABS depots
- ✓ Full range of accessories

# YOU WON'T SEE THE DIFFERENCE. YOU WILL EXPERIENCE IT.

**Knowing which pump is best for the job depends on many factors. Job conditions and deadlines set different requirements for choosing the right pump type. And the right partner for the job.**

At ABS, our interest in dewatering runs deep. Exceptional application knowledge, smart engineering and quality workmanship has resulted in a complete line of dewatering pumps. Our solutions are submersible and engine driven, eliminating any problems concerning site conditions and facilities.

## **Easy does it**

The properties of a pump are important. Flow rates, seal type, energy consumption and other specs are highly relevant if you're planning for a big project.

But for many users, they just want water to go away, now. Selecting a pump that is easy to use is a major concern.

ABS solutions for dewatering include pumps that are lightweight, portable and start when you plug them in. Could it be any easier than that?

## **Innovative solutions**

ABS continuously develops our products and services based on professional user needs. The latest addition is the built-in Softdrive concept, that minimises both power supply demand and starting current, while providing a smooth operation. It also features an intelligent protection such as impeller rotation, motor protection & power check at start-up.

## **KEY PRODUCT BENEFITS**

### **Trouble free and safe handling**

- Robust design
- Low weight
- Can run dry
- Easy installation
- Built-in motor protection
- No external moving parts

### **Easy maintenance**

- Modular design
- Interchangeable parts
- Easy to adjust and replace parts

### **ABS also offers engine driven pumps**

- Diaphragm, centrifugal and trash pumps
- Handels high solid content
- High suction lift
- Silenced or conventional engine specifications
- Self-priming or vacuum assisted pump ends

## **IS YOUR PUMP UP AND RUNNING?**

**In many cases, by the time you realize your pump has stopped it is too late. Water levels have risen and your site is flooded, equipment damaged and work delayed. With ABS surveillance services you will have online access to your equipment 24/7.**

As part of our complete dewatering solution, ABS offers 24-hour on-line surveillance of the equipment. Using state-of-the-art pump monitoring units, the system ensures that you always know that your dewatering equipment is operating as required. Making use of web technology, access to information is always available, only one click away. In case of stopping, the system generates

an alarm sent out by sms or e-mail, completely according to your requests.

By making use of our extensive network of service centers and partners, problems can be resolved quickly and efficiently without disruptions to your schedules.

## **ABS 24H REMOTE SURVEILLANCE**

- Built-in control equipment
- Pump failure alarm
- GPS location information
- Alarm management
- By sms or internet

# NEEDS ARE CHANGING. DEADLINES AND BUDGETS ARE NOT.

At ABS, we don't just make dependable pumps. We can also help you make the plans for their most efficient use, in virtually any situation.

Changing needs over the project duration can make financing of a dewatering project a real challenge.

ABS does not only offer an extensive range of equipment and service, but also allows you to choose the most suitable way to finance your project. Options include purchase, rental or extended lease contracts. In short, maximum flexibility to create the best and most efficient solution for your project.

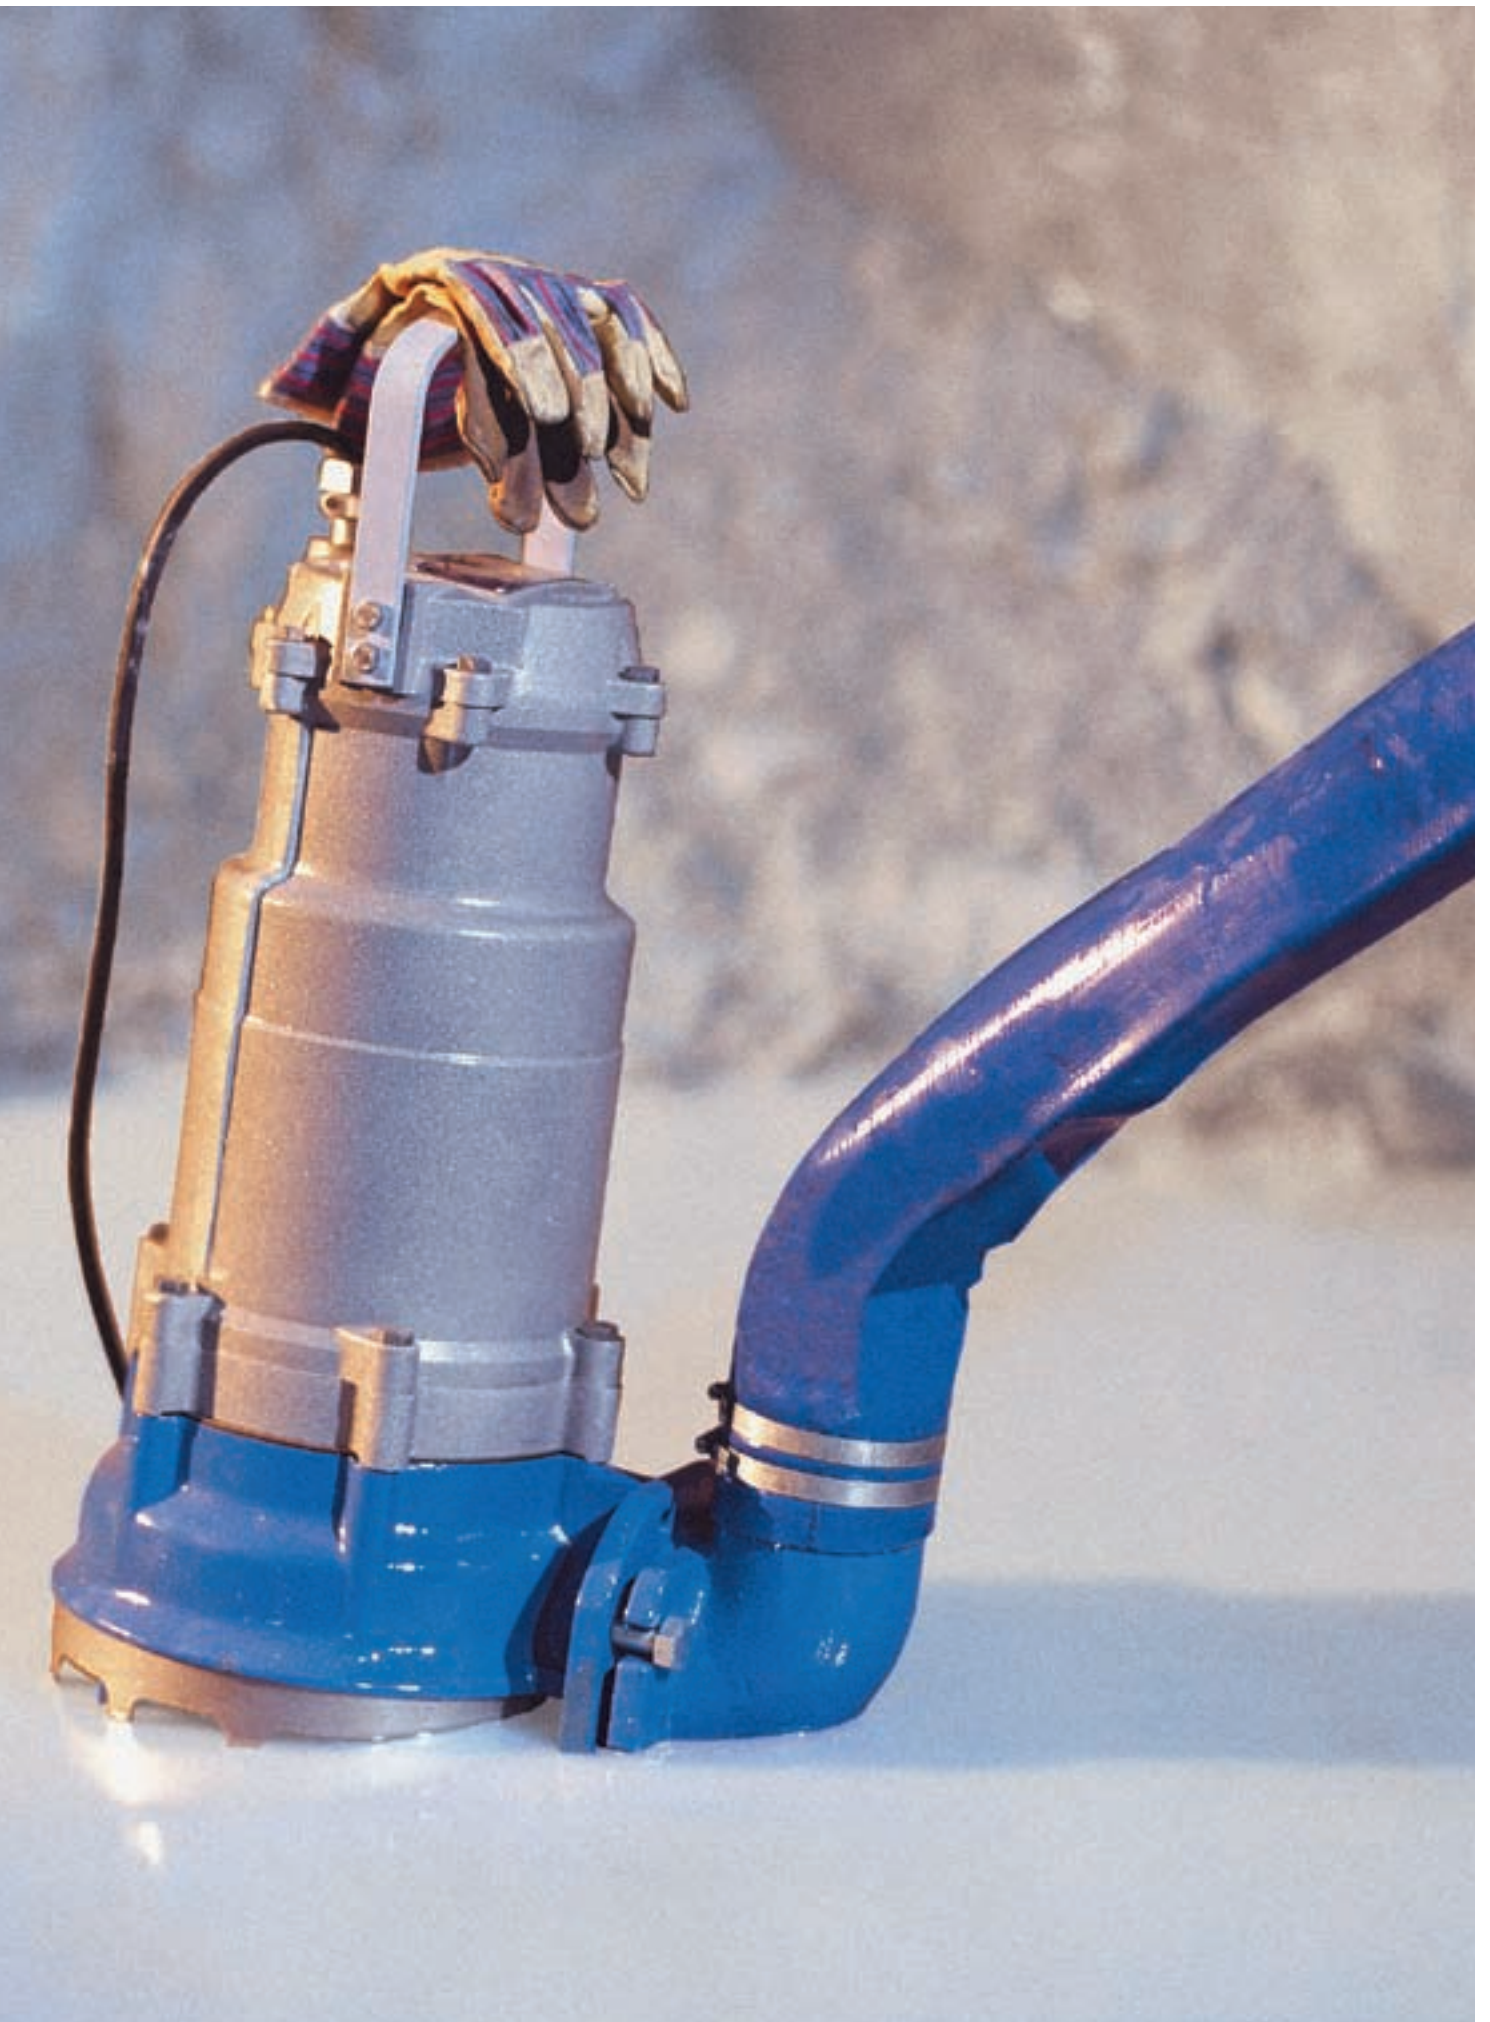

## GOT A PROBLEM? ABS HAS THE SOLUTION

Put our application knowledge to work and let us create a solution based on your specific conditions.

- ✓ What you are pumping
- ✓ Requested flow
- ✓ Site conditions
- ✓ Time schedules
- ✓ Availability and logistics
- ✓ Need for emergency or back-up service
- ✓ Suitable mix of rent/buy types of pumps
- ✓ Project planning
- ✓ Purchase, rental or leasing

# ABS GROUP. WE KNOW HOW WATER WORKS.

**Water is the heart of our business. We see to its transport and treatment, serving countless people worldwide. Our application know-how and leading solutions and services are evidence of our firm commitment to wastewater and dewatering technology.**

Founded in 1860, ABS today is a global solution provider in wastewater and dewatering technology with a complete product portfolio of pumps, mixers, agitators, aerators, compressors, control & monitoring equipment, and services.

#### **A strong partner...**

With 40 subsidiaries and distributors in more than 100 countries\*, ABS supports customers in solving their dewatering needs worldwide, every day. It doesn't matter if you rent our pumps or buy them, or simply need good advice –

\* All services not available at all locations.

expert knowledge is always close at hand. With more than 2100 employees, we can offer out-standing application know-how, and a good answer to your questions.
